## **“The Psychology of Social Class and Financial/Health Crises”**

**Ginés NAVARRO-CARRILLO, PhD**  
**Department of Social Psychology**  
**Psychology of Social Problems Research Group**  
**University of Granada - Granada - Spain**

Recent research has revealed that social class contexts and the economic and health crisis related to the covid-19 pandemic shape perceptions of the social environment, other-oriented emotions, and social behavior. Based on a social cognitive perspective, I will present a set of our correlational, experimental, and longitudinal studies examining the effects of (objective and subjective) social class and economic/health threat on trust, well-being, mental health, and pro- and anti-social tendencies.
